AI Applications Designer

Mai 2025 - Present (8 Monate)

Hamburg, Germany

PROMATIS

Consultant Data Analytics

Oktober 2024 - April 2025 (7 Monate)

Hamburg, Germany

Optimised Oracle EPM Cloud Planning & Budgeting for a leading energy-trading client, streamlined data integrations, tuning Calculation Manager business rules, Smart View templates, and process integrations with NetSuite, cutting month-end processing time.

Built self-service membership analytics for a major Swiss trade-union with Oracle OTBI + BI Publisher, delivering interactive KPIs that let executives track retention and campaign ROI in real time.

Modelled end-to-end business processes in Horus Business Modeler, ensuring every analytics asset aligned with documented workflows and compliance needs.

Developed and deployed artefacts across Data Manager, Calculation Manager, Financial Reporting Web Studio, Smart View and BI Answers, balancing performance with maintainability.

Keywords: Oracle EPM Cloud (PBCS/EPBCS) • OTBI • Smart View • BI Publisher • FP&A • KPI Dashboards • Process Mapping • Agile Delivery • Data Governance

EMPIT GmbH

Data Analyst

November 2022 - Oktober 2024 (2 Jahre)

Hamburg, Germany

- Owned the end-to-end data pipeline for above-ground Current Magnetometry Inspection (CMI) projects, ingesting, cleansing and spline-matching magnetic signals for 20-plus “unpiggable” pipelines across Europe.
- Built Python/SQL quality-control scripts that automatically flagged calibration issues and exported validated results to EMPIT’s customer web-apps, cutting manual checks to minutes and improving client turnaround times.
- Coordinated final reviews with inspection engineers and uploaded interactive reports, ensuring field-to-report delivery met stringent integrity-management standards.
- Drove continuous-improvement initiatives, designed Trello-based automation flows and introduced process KPIs that raised team throughput.
- Research & change management: authored a bachelor thesis comparing agile frameworks, applied AHP to select Scrumban, and rolled out the board & CI loop across the Data-Analytics team

Starship Technologies

3 Jahre 4 Monate

Operation Specialist

Mai 2020 - November 2022 (2 Jahre 7 Monate)

Hamburg, Germany

Created and continuously optimised 3-D maps of industrial campuses and the city of Hamburg to maximise autonomous-delivery coverage while complying with local traffic regulations.

Led Mapping-Projects on-site & remote enterprise launches (Merck KGaA, Wacker, La Roche), coordinating cross-functional playbooks.

Owned the weekly KPI pipeline (SQL + Google Apps Script), with automating it, I slashed report prep from 4 h → 30 min and giving engineering & client teams near-real-time fleet insights

Field Assistant and Robot Operator

August 2019 - November 2022 (3 Jahre 4 Monate)

Monitored live robot fleets, intervening remotely to overcome navigation challenges and logging incidents for engineering follow-up.

Assisted in area mapping and route optimisation during launches in Finland and Germany, shortening ramp-up time by 30#%

Hamburg University of Applied Sciences

Tutor

Oktober 2020 - März 2021 (6 Monate)

Hamburg, Germany

Electrical engineering Tutor ET1
